Leigh Building Products are the most complete and widely accepted line of metal building products in the building industry. These products are truly outstanding because each and every item has been carefully engineered to function better, give longer service and install easier. Superb styling is apparent in every product. Mass production in one of the nation's most modern and efficient plants brings you these high quality products at the lowest possible price.

The finest of finishes are automatically applied and Infra-Red baked on this unique machine. Typical of the equipment used to manufacture these fine products.

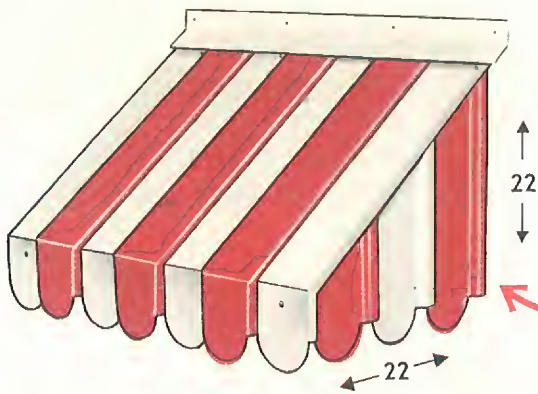

You'll find that a most cordial welcome awaits you when you visit our modern plants.

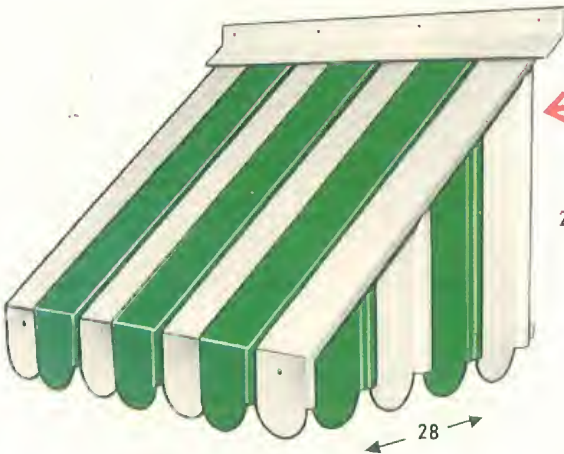

The efficiency of these modern machines is unequalled — you benefit from their greater production and uniform high quality.

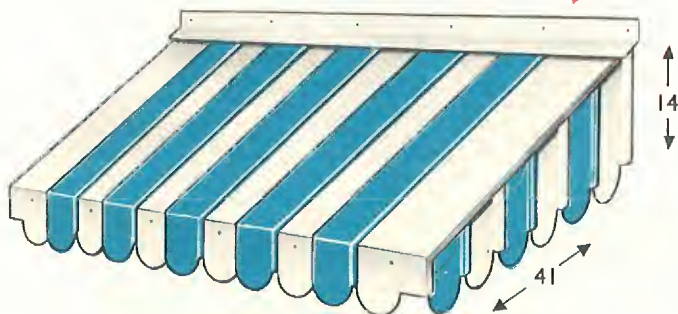

LEIGH IMPERIAL AWNINGS AND CANOPIES ARE AVAILABLE IN 4 STYLES AND MOST ANY WIDTH

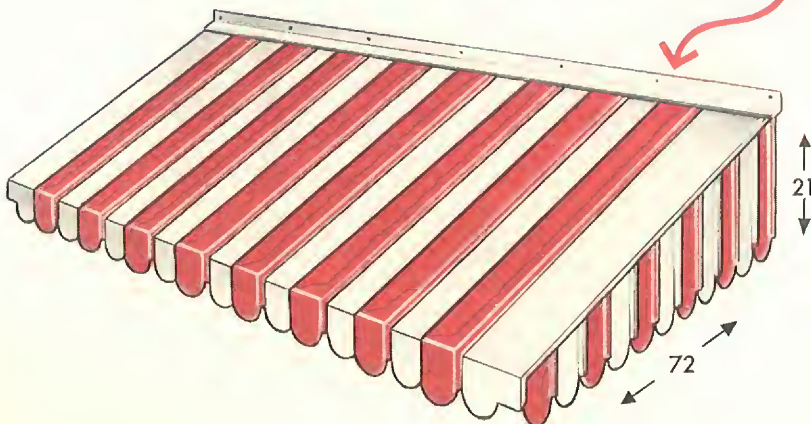

1A The most popular style on the market. Its compact size and correct proportions meet the needs of most all installations for small to medium size windows. 22-inch projection and 22-inch drop. Provides ample protection for smaller installations. Complete range of sizes shown on Page 5.

2A Ideal for installation on medium to large windows and screened porches, also excellent for many commercial buildings such as offices and factories. Gives added protection against snow and rain, increases shade area. 28-inch projection and 28-inch drop. See Page 5 for the complete range of sizes.

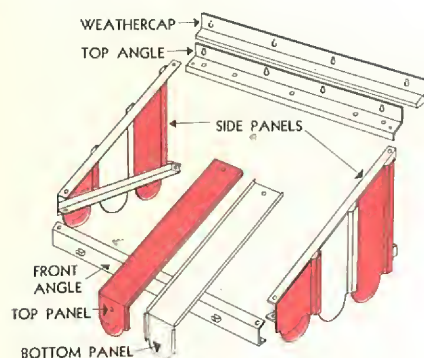

3C Recommended for use over doors. Ample projection for complete snow and rain protection. Especially suitable for porches, terraces and store fronts. 41-inch projection and 14-inch drop. 50-inch width recommended for back and side doors, 60-inch width for front doors. See Page 5 for complete listing of sizes.

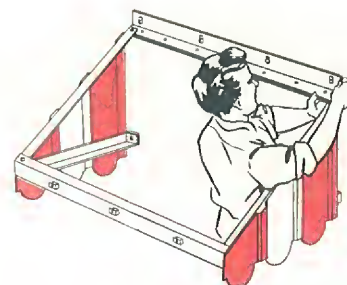

4C Big 72-inch projection — excellent for porches or terraces, and all commercial needs. 14-inch drop — gives modern low look. Widths from 50" and up, to fit all factories, stores and other large installations. Complete listing of sizes shown on Page 5.

Leigh Imperial Awnings & Canopies are available in the following color combinations. Red & White, Green & White or Blue & White.

Everything in a package for one complete Awning installation. Side panels come assembled and all necessary screws and bolts are furnished, along with complete, easy to follow installation instructions.

Top angle is used to mark screw hole location. Small size awnings can be assembled on the ground and hung in place on screws — large size awnings can be easily assembled on the wall.

All screw and bolt holes are die stamped for accuracy and easy assembly. You have no cutting and fitting problems when you install the Leigh Imperial Awning.

Once the outside frame is assembled, it takes only a few minutes to slide and bolt the top panels in place. The finished assemble is now strong and rigid — able to withstand winds, snow and falling icicles.

WHEN ORDERING

Specify — Size, Color and Style. When checking size to fit window, door, etc., remember that unit is built in 5" multiples.

| 95" | 50 | 57 | | | | | | | | |

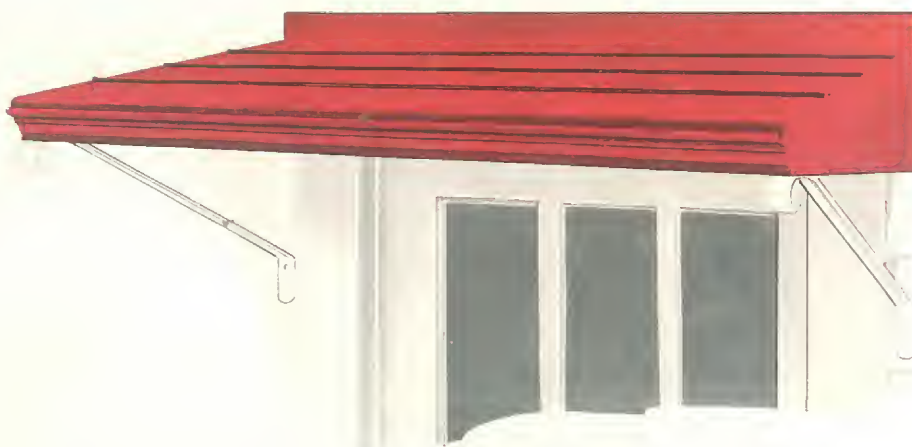

Straight back braces can be furnished for 22", 28" and 41" projections up to 90" widths. For widths over 90" — angle braces make a better installation. One Angle Brace is furnished at no charge with all sizes over 70" wide. If extra braces are desired specify number and type required.

Standard Sizes
carried in stock

Style 1-A and 2-A — fits most windows.

Style 3-C — for standard doors.

Style 4-C — for doors and commercial use.

Shelter your doorways from beating rains and driving snows — at a cost far less than a like canopy built out of wood — with these attractive Leigh Bel-Air Door Canopies.

LEIGH *Bel-Air* DOOR CANOPIES

Bel-Air Canopies are low cost, correctly styled units, completely assembled for fast installation. Front edge has drip channel to carry water off to the sides and prevent icing of steps in winter. Units are built of Double-Protected Steel for long life. Finish is two coats of weather-resisting baked-enamel.

Packaged in individual shipping containers complete with ornamental braces and screws. Specify size and color.

Measure width of door plus casing — allow about 10 inches for side coverage. Two sizes 48" (for 2'-6" or 2'-8" doors) 54" (for 3'-0" doors).

1. Nail or screw flashing to house.
2. Fasten angle braces.
3. Heavy steel ornamental braces screw to canopy and house.

*A beautiful low cost
Awning that comes to you
completely assembled and
can be installed by anyone
in a matter of minutes.
Gives year 'round
protection from rain,
sun, and snow.*

LEIGH *Bel-Air* AWNINGS

3 SIZES

| Size (Width) | For Window Glass Size | Weight |
|-----------------|--------------------------|---------|
| 30" | 20" to 24" | 13 lbs. |
| 36" | 24" to 28" | 15 lbs. |
| 42" | 32" to 36" | 17 lbs. |

*Individually packaged, complete
with ornamental braces, screws,
etc. Specify size and color.*

An attractive one-piece permanent metal awning that gives cool shade without cutting off light and ventilation. Low priced for the economy-minded buyer. One-piece construction makes installation easy and prevents rattles. Long life is assured by protective coatings of zinc, bonderizing, baked primer and enamel finish. Three attractive colors to choose from, with white enamel on underside — for lighter rooms. Made in 3 standard sizes to fit all standard windows. To select correct size, measure to outside of window frame and choose awning closest to this measurement — if awning is not exact size of window frame, use next larger size.

1. Fasten flashing flange to house with nails or screws.
2. Fasten angle braces.
3. Attach heavy steel ornamental braces to awning and house.

You'll be more than pleasantly surprised with the charm and dignity Leigh Ornamental Shutters will give to your home. The smallest "Plain Jane" house takes on a warm lived-in look when Leigh Shutters are installed . . . and they are every bit as appropriate for the mansion on the hill.

LEIGH ORNAMENTAL METAL SHUTTERS

Louvers are formed from a continuous strip, yet give the appearance of being separate louvers. Louvers are securely locked to side and top margins, cannot rattle or fall out.

LOUVER DESIGN

Reproduction of early American design. Full one-inch depth. Solid center web eliminates rattles and vibration. Built of heavy gauge aluminum.

PANEL DESIGN

Recessed panel design with attractive pine tree cut-out . . . this unit is built of Double-Protected Steel and is somewhat lower in price than louvered design.

LOUVER DESIGN

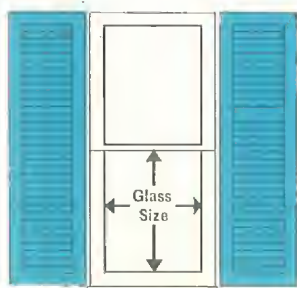

PANEL DESIGN

Before and after views illustrate how an installation of Leigh Shutters changes a plain house into an interesting and charming home.

HOW TO MEASURE

Leigh Shutters are built to match window sizes, no troublesome cutting or fitting necessary. Measure glass size and order shutter size to match from table of standard sizes shown below. Finished in Green Prime Coat, Infra-Red Baked Enamel, can be painted to harmonize with color scheme of house.

STANDARD SIZES

| Overall Width and Height | Pair Size of Shutters (1½" higher than window) | Glass Size (2-Light window) |
|--------------------------|--|-------------------------------------|
| 14" x 39½" | 2' 4" x 3' 3½" | 24" x 16" |
| 14" x 43½" | 2' 4" x 3' 7½" | 24" x 18" |
| 14" x 47½" | 2' 4" x 3' 11½" | 24" x 20" |
| 14" x 51½" | 2' 4" x 4' 3½" | 24" x 22" |
| 14" x 55½" | 2' 4" x 4' 7½" | 24" x 24" |
| 14" x 59½" | 2' 4" x 4' 11½" | 24" x 26" |
| 14" x 63½" | 2' 4" x 5' 3½" | 24" x 28" |
| 17" x 51½" | 2' 10" x 4' 3½" | 28" x 22" 30" x 22" 32" x 22" |
| 17" x 55½" | 2' 10" x 4' 7½" | 28" } 24" |
| 17" x 59½" | 2' 10" x 4' 11½" | 30" } 26" |
| 17" x 63½" | 2' 10" x 5' 3½" | or } 28" |
| 17" x 67½" | 2' 10" x 5' 7½" | 32" } 30" |
| 17" x 79½" | 2' 10" x 6' 7½" | 6' 6" or 6' 8" Doors |
| 20" x 55½" | 3' 4" x 4' 7½" | 36" x 24" |
| 20" x 59½" | 3' 4" x 4' 11½" | 36" x 26" |

DOORWAYS

An unusual and pleasing entrance can be created by installing Leigh Louver Shutters on each side of the door — standard heights are available for this type of installation.

Packed two per corrugated shipping container. Heights over 65½" are of 2-piece construction and are packed one complete shutter per carton.

LARGE SIZE

LEIGH SCREEN DOOR GRILLES

A low cost way of making your screen doors more attractive, plus of course, protecting them from burrying children and impatient dogs. Puts an end to bulgy torn screens. Leigh Screen Door Grilles are also excellent as window guards — they keep small children from falling out the window and discourage prowlers.

LEIGH SCREEN DOOR PUSH BARS

Work magic on Screen doors with these handsome push bars. Sturdily built — gracefully designed — harmonize with Leigh Screen Door Grilles.

Fully adjustable to fit all standard doors and windows. Built for long-term service of heavy gauge ($\frac{1}{8}$ " thick) rounded-edge bar steel. Handsome Colonial Black finish and smart, simple styling harmonize with all homes. Installation is a cinch — simply attach with furnished screws. Packed 10 per carton — specify size.

LARGE SIZE Fully Adjustable. Fits any 2'-6" to 3'-0" screen door and most windows. Adjusts in width from 12" to 34". Shipping weight 39 lbs.

MEDIUM SIZE. For doors with horizontal bar or combination doors. Adjusts from 11 to 30 inches wide. Shipping weight 33 lbs.

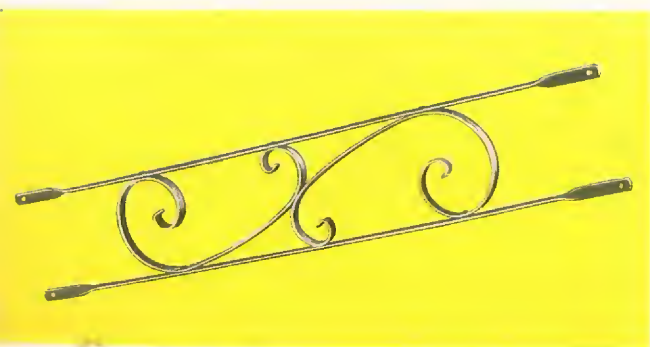

SMALL SIZE. Use in pairs on doors with vertically and horizontally divided sections. Shipping weight 18 lbs.

MEDIUM SIZE

SMALL SIZE

PUSH BARS are made of heavy gauge ($\frac{1}{8}$ " thick) rounded-edge bar steel. Handsome Colonial Black finish. Two sizes — for 32" or 36" wide doors. Packed 10 per carton. Specify size when ordering. Shipping weight 18 lbs. and 20 lbs.

ENCHANTMENT DESIGN

A beautiful full depth cast aluminum scroll of swirling leaf design. Adds charm and distinction to your doorway.

LEIGH SCREEN & STORM DOOR SCROLLS

MORNING GLORY DESIGN

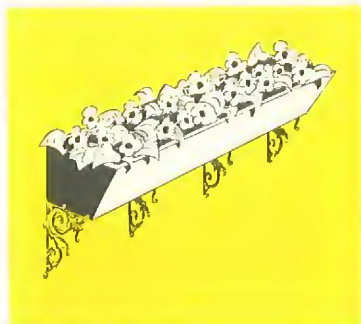

A charming design of entwined leaves and flowers, like morning glories blooming 'round your door.

Both designs were handcarved from wood for rich detail and depth. Castings are rust proof aluminum, finished in textured white enamel. They fit any screen or storm door and can be installed in minutes. They give added bracing and increase life of the screen or storm door.

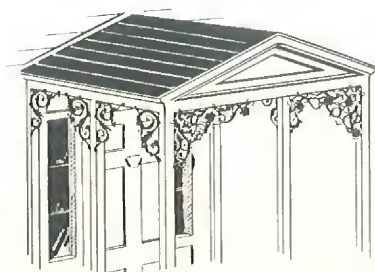

Order by sets, specify design.

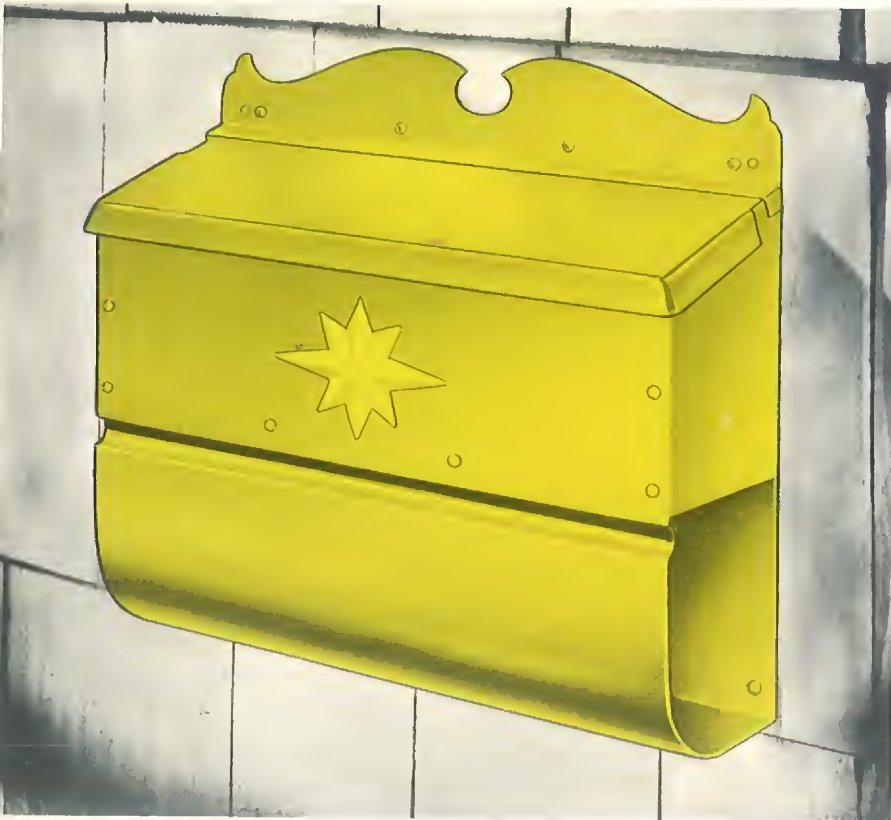

MORNING GLORY DESIGN. Packed 2 per set. Use at diagonally opposite corners of the door, or on large doors, use one in each corner. Size 20" x 14". Wt. 3 lbs.

ENCHANTMENT DESIGN. Packed 4 per set. Use one at each corner of the door. Size 11" x 9". Wt. 1½ lbs.

Don't overlook the many other uses for these scrolls — as decorative braces on porch columns, bookcases, shelves, flower box supports, etc.

A truly handsome mail box with all the charm of hand-wrought craftsmanship. The top section protects your letters from the weather, and the large magazine compartment below is big enough to hold the largest magazine or Sunday Paper.

ARISTOCRAT MAIL BOXES

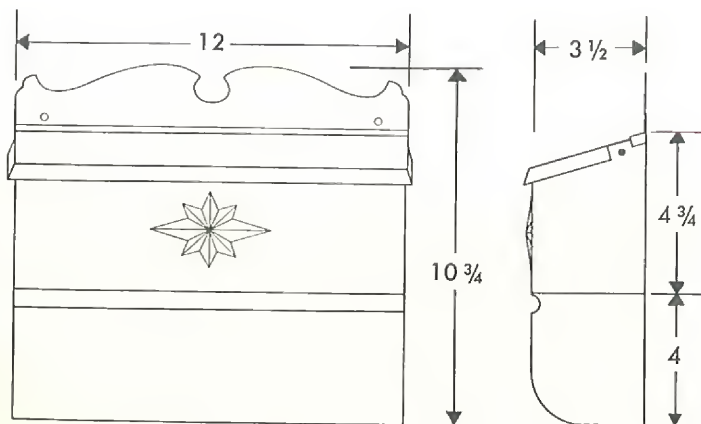

These attractive combination mail boxes have weather-tight letter section, plus large magazine compartment below. Embossed medallion on letter compartment adds a quiet decorative touch. Built of heavy gauge rust proof aluminum. Available in two finishes: Colonial Black — ideal for use with popular Colonial Black Hardware — and Antique Bronze, with rich patina finish. Shipping weight — 21½ lbs. When ordering specify finish.

COLONIAL BLACK FINISH

ANTIQUE BRONZE FINISH

Easily installed — simply screw in place.

Smart styling and convenience are yours with a Leigh Built-In Mail Box. Your mail is delivered inside your house — safe from the weather, safe from mail-box thieves. Style "D" is designed for door installation. Style "W" installs in walls and has a spacious metal box that holds loads of mail. Outside Mail Slot is made of heavy rust proof aluminum — finished in beautiful Antique Bronze or Colonial Black

SMARTLY STYLED INNER
DOOR
Colonial Black or Bronze Finish

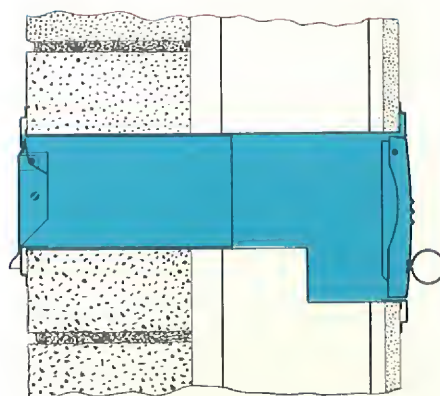

DOOR INSTALLATION — The Style "D" Mail Box unit is easily installed in any standard door. The attractive outside door slot fastens on outside of door and matching hood fastens on inside of door. Mail falls on floor inside of door. Heavy spring closes mail door and does not rattle when door is opened or closed. Inside hood conceals opening. Specify finish and style — Colonial Black or Bronze. Individually packed, shipping wt., 1 $\frac{1}{4}$ lbs.

DOOR INSTALLATION

WALL INSTALLATION — The Style "W" Mail Box unit can be installed in any standard frame or brick wall. The attractive outside mail slot opens into a spacious metal box that holds loads of mail. The smartly styled inner door (located on the inside wall) provides access to the box. Specify finish and style — Colonial Black or Bronze. One complete unit per carton (Mail Slot, Inner Door, Adjustable Metal Box and screws), shipping wt., 13 $\frac{1}{4}$ lbs.

WALL INSTALLATION

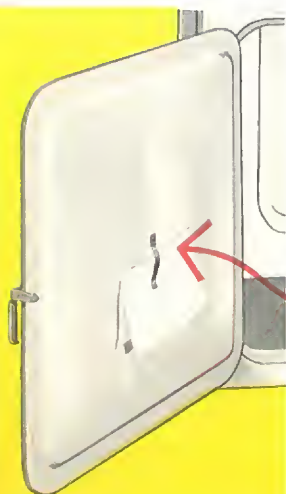

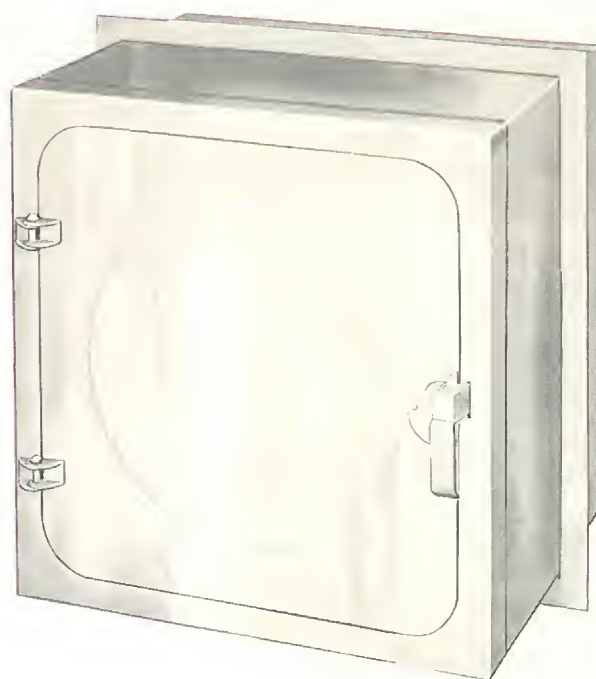

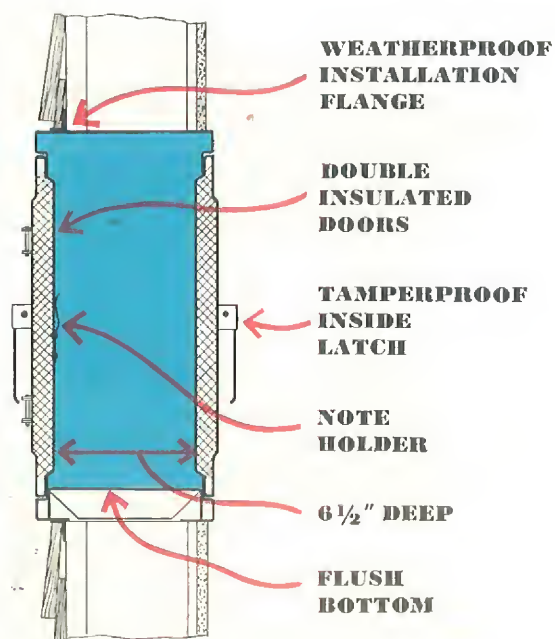

No more cleaning up mud and dirt after deliverymen when you have a Leigh Milk and Package Receiver. Packages and milk are protected from animals, heat or cold in this insulated unit — and at such a low price you just can't afford to be without one.

LEIGH MILK AND PACKAGE RECEIVERS

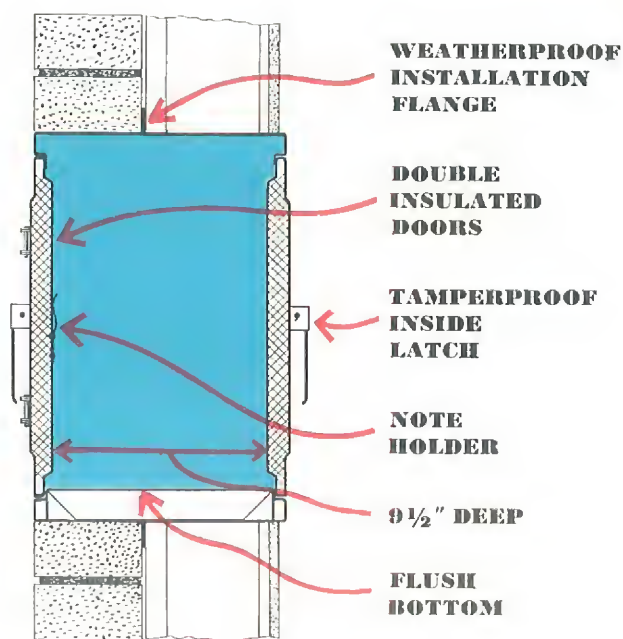

Only Leigh Milk and Package Receivers have all these outstanding features: Smart styling — rounded doors and frames eliminate sharp corners. Embossed double doors have thick space filled with insulation for year-round temperature protection. Convenient note holder on outside door for messages, orders, etc. Positive latches hold doors tightly closed, inside door can't be opened from outside. Flush bottom is easily cleaned. Weather-proof flange seals wall opening and simplifies installation.

Handy Note Holder is wonderful for leaving orders, instructions, etc. . . . just one of the many features that make this unit so popular with the housewife.

FRAME CONSTRUCTION

BRICK CONSTRUCTION

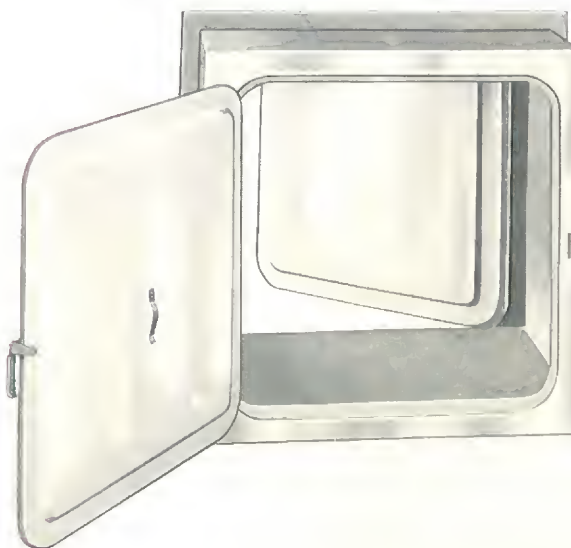

SIZES

| Style | Overall Depth | Wall Opening | Shipping Weight |

| "F" | 6 1/2" | 14" x 14" | 14 lbs. each |
| "B" | 9 1/2" | 14" x 14" | 16 lbs. each |

Packed one per carton.

Painted Aluminum Prime Coat.

Leigh Milk and Package Receivers are built of heavy gauge Double-Protected Steel. Heavy-duty hinges and latches are built to give long service. Both double doors are filled with insulation to protect contents of receiver from heat and cold. Complete unit ready to install is packed in individual corrugated shipping container.

A small wonder housewives call it the kitchen magician. Kitchen sweepings vanish down the chute into the dust bin in the basement. An attractive face located in the baseboard opens at the touch of your toe and stays open until tripped shut. Completely does away with the old fashioned dust pan — and the cost is surprisingly low.

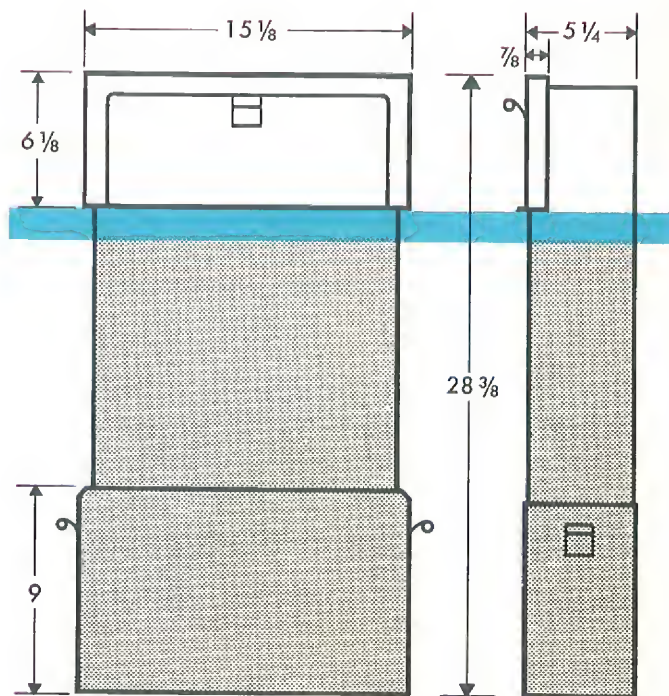

LEIGH BUILT-IN DUST CHUTES

The Leigh Dust Chute is built of heavy-gauge metal, with welded construction; will last the life of the house.

UNIT IS MADE UP OF THREE PARTS

FACE fits into baseboard with spring loaded door that trips open until tripped shut. Finished in Infra-Red Baked White Enamel. CHUTE extends a short distance down into basement. DUST BIN fits onto bottom of chute and slides off easily for periodic emptying.

Installation is simple, and complete installation instructions are included with each Dust Chute. Ship as complete unit, Face, Chute, and Dust Bin. One per shipping carton. Wt. — 12 lbs.

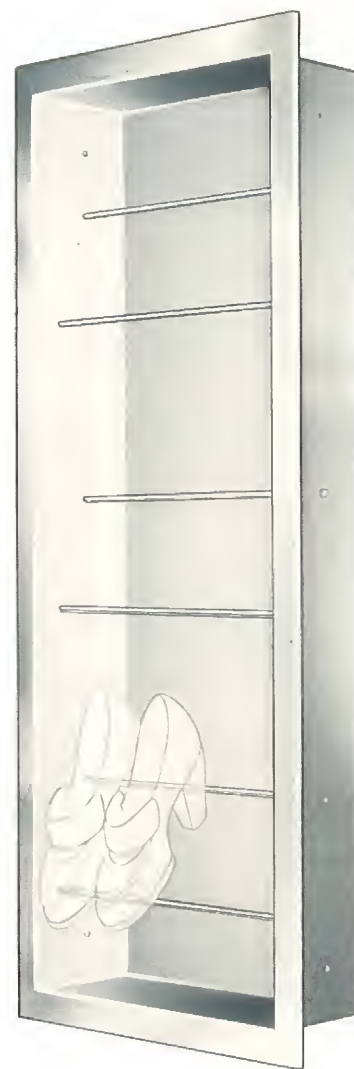

If your closet floor is littered with shoes and you're tired of fumbling in the dark, the Leigh Recessed Shoe Rack is the answer to your problem. Recessed back into the wall they take up no closet space. They store your shoes in neat rows and they're low in cost. Easy to install when you're building and just as easy to install in an old house.

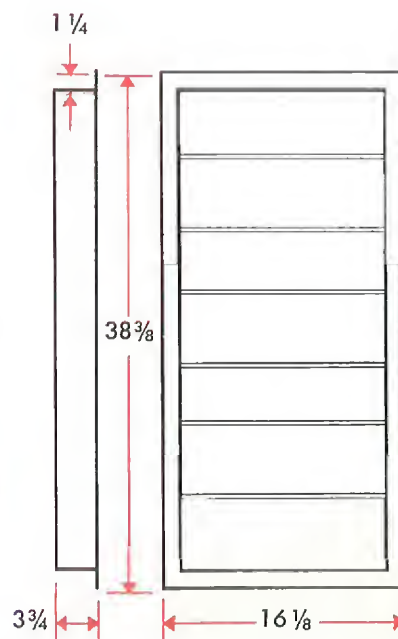

LEIGH RECESSED SHOE RACK

The perfect answer to the shoe storage problem — each unit holds up to 6 pairs of shoes. Unit is sized to fit between studding and is correct depth for dry wall installation. Wide flange around front edge covers opening when installed in old homes — an excellent selling feature in new or remodeled homes.

Built of heavy-gauge Double-Protected steel, welded construction. Finished in an easy-to-clean, white baked enamel. Packaged two per carton. Shipping wt. 16 lbs.

Fits 14½" x 36⅛" opening. 3¾" depth gives flush installation — even with dry wall construction. Wide margin (1¼") covers rough edges of opening.

Why wrestle heavy laundry baskets down to the basement? A handy clothes chute ends that chore forever. Just push laundry into the Leigh Clothes Chute door — it's out of mind 'till wash-day comes around. Keeps clothes conveniently at hand, ready to pop in your washer.

LEIGH CLOTHES CHUTE DOOR

Hinged door swings up as you push your clothes in chute, spring action automatically closes door against rubber bumper. The attractive round opening has rolled edges — will not catch buttons or tear clothes. Ideal for home, restaurants, hotels, etc.

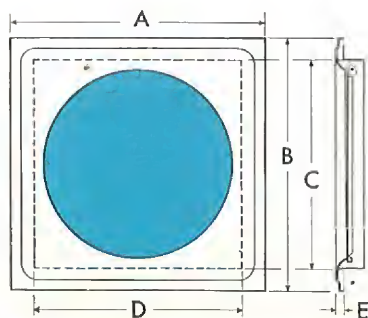

Attractive modern styling — finished in glistening white baked-on enamel that wipes clean with a damp cloth. Heavy-gauge steel construction will last a lifetime. No screws show — easily installed by means of flanges on the back of the face, nail or screw into the side of chute or studding. Wide margin covers edges of opening.

MADE IN TWO SIZES

10" SIZE fits opening 10" x 10". Overall size 12" x 12". White baked enamel finish, individually packed. Shipping wt. — 3½ lbs.

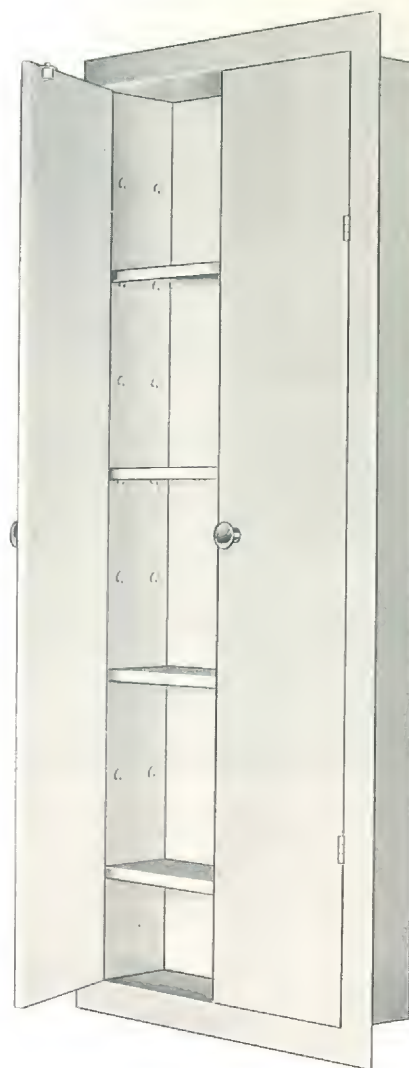

12" SIZE Fits 12" x 12" opening. Overall size 13¼" x 13¼". White baked enamel finish. Individually packed. Shipping wt. — 4 lbs.

DRAWING SHOWS BACK AND SIDE VIEW.

| LISTED SIZES | A | B | C | D | E |
|--------------|------|------|------|------|----|
| 10" | 12" | 12" | 9⅞" | 9⅓⅙" | ¾" |
| 12" | 13¼" | 13¼" | 11⅝" | 11¼" | ¾" |

Here is the magic low-cost formula for additional cabinet space in any home — new or old. Leigh all-purpose Cabinets can be installed any place at a cost far below a built-in wood cabinet. They are so attractive — can be used in modern kitchens, halls, bathrooms, and hundreds of other installations.

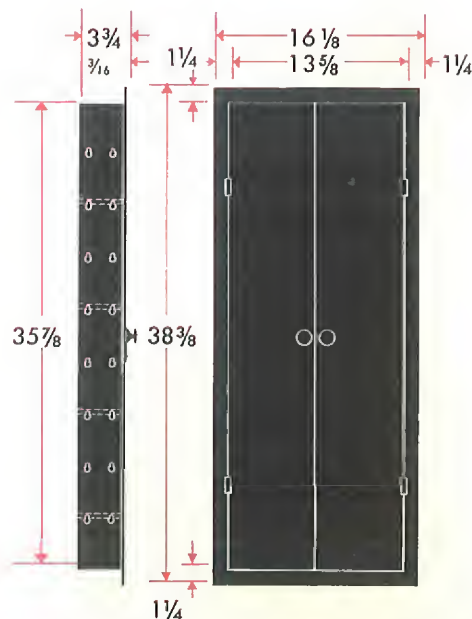

LEIGH ALL-PURPOSE CABINETS

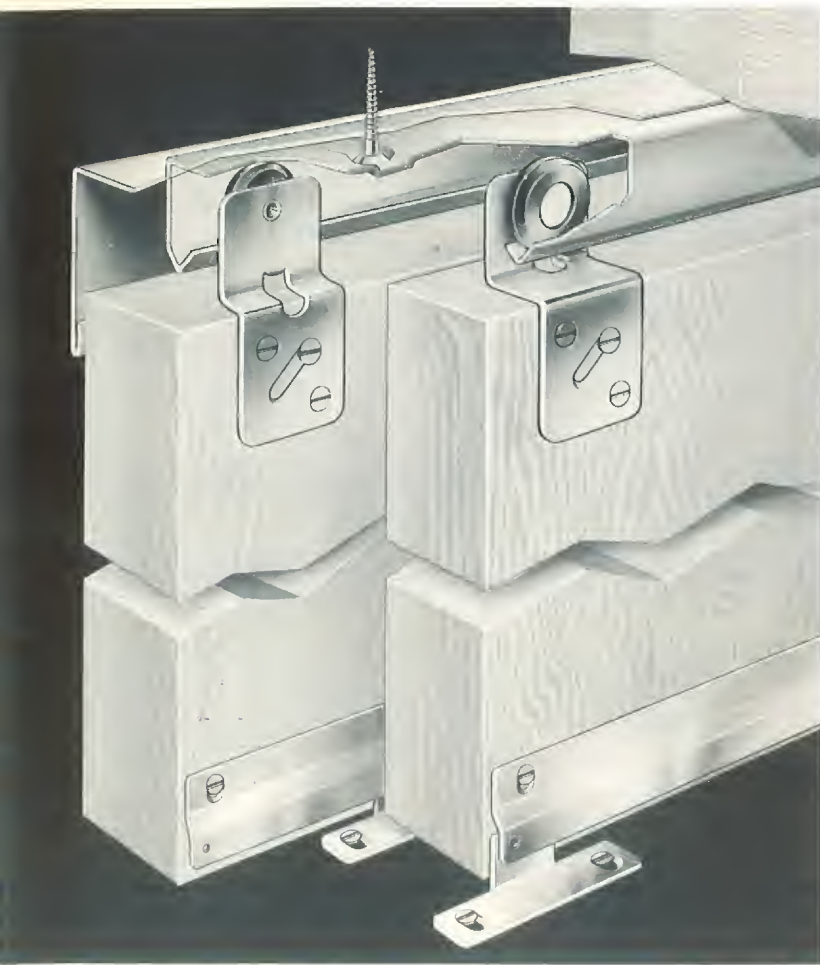

*A thousand uses
all over the home*

Cabinets are built of heavy gauge, Zinc Coated and Bonderized Steel. Double doors allow easy access after unit is installed. Doors are equipped with attractive knobs. A wide flange covers any irregularity of hole on remodeling. The four shelves are easily adjusted to any desired storage arrangement. Finish is white baked enamel . . . easy to clean, or can be overpainted to match room colors.

Cabinet is correct size to fit between studs, and the right depth for dry wall construction. Packed one per carton — shipping wt. 17 lbs.

You'll agree that sliding door installations, with their added space and convenience, are one of the really worth while innovations in modern building methods. People everywhere are enthusiastic about Leigh Sliding Door Hardware — for they know that it is the only hardware that gives smooth, trouble-free operation and is easier to install.

LEIGH LOK-TAB* SLIDING DOOR HARDWARE

SAVES MONEY ON INSTALLATION TIME.

The Lok-Tab* — found only on Leigh Sliding Door Hardware — is the secret of this lower installation cost. It makes it easy to hang the doors from the *outside*. And assures you that the doors will never come off the track.

Only 3 steps for a complete installation. An installation that results in smooth-rolling doors — for years of trouble-free satisfaction.

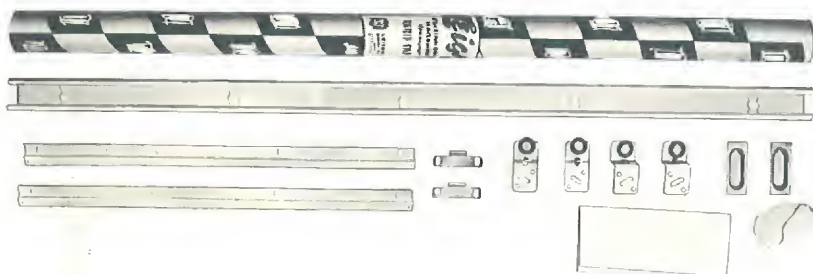

* Patents Pending

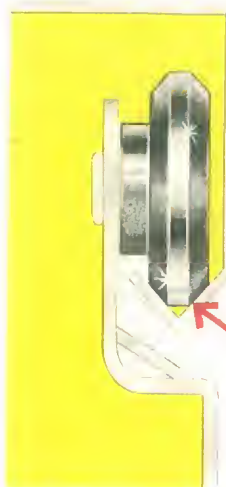

THESE FEATURES MAKE LEIGH SLIDING DOOR HARDWARE YOUR BEST BUY

Complete Package — contains everything you need for a complete installation — including such items as screws and door pulls. No annoying return trips to purchase extra parts. All parts are packed in a sturdy shipping container — it's easier to stock, simplifies storage and prevents loss of parts when on the job.

Here's what you get in a typical 2-door set: Track · Four Hangers · Two Guide Strips · Two Guides · Two Brass Recessed Door Pulls · All Necessary Screws · Complete Instructions.

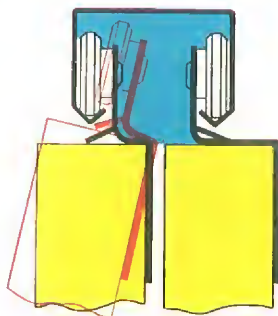

THE WHEEL

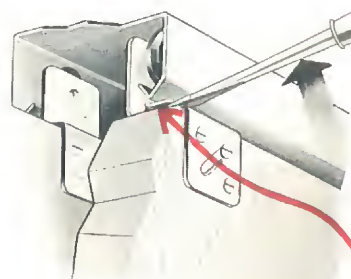

The "Sturdico" Wheel — used only on the Leigh Door Hanger — is the finest money can buy. Superbly efficient — not affected by oils, grease or moisture, never develops flat spots as do other plastic wheels. Its built-in lubrication assures endless, quiet, smooth operation, even with the heaviest doors. Wheel rides the sides of the V-shaped track — dirt and dust can't interfere with its operation.

INSTALLS QUICKER

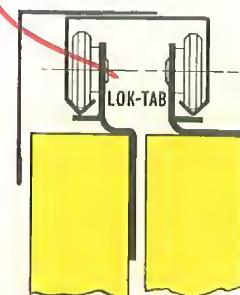

The complete unit, including doors, is installed from the front — saves installation time. Doors align quickly — hangers are easily removed for adjustment by simply lifting door from the track — no tricky puzzle in getting wheels free. The door guides are attached to back of doors — eliminates time-consuming grooving of doors and gives a better, smoother-sliding action.

LOK-TAB* KEEPS DOOR FROM JUMPING OFF TRACK

Set Lok-Tab with screw driver. If necessary, Lok-Tab can be bent down again to remove door.

*Patent Pending

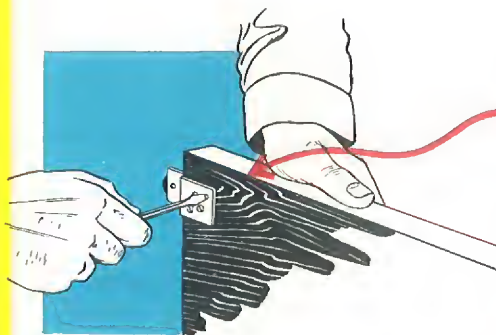

Complete instructions, with step-by-step illustrations, are included in every set.

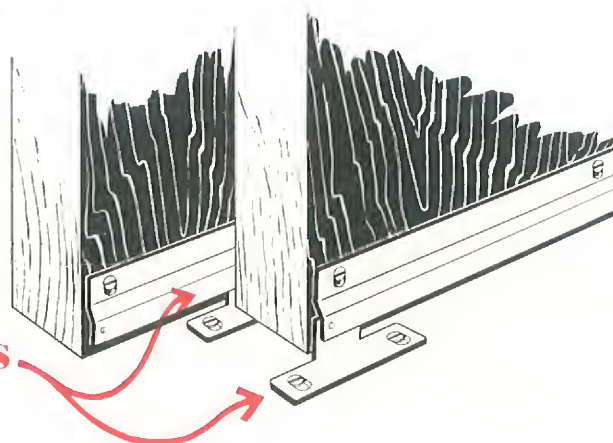

*Be sure header is level
before track is installed.
Locate track at correct
distance back of frame
(see Instruction Sheet with
set) and screw to frame.*

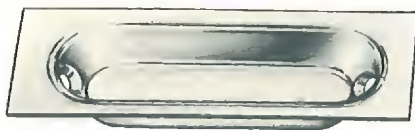

Easily installed — slotted holes align fascia with doors of any thickness. It conceals track and hangers, can be painted to match trim. Available as an extra in standard lengths.

Hangers are attached to doors before hooking hangers on track. Adjustment slot on hanger permits easy alignment of doors in opening.

INSTALL GUIDES & GUIDE STRIPS

DOOR PULLS

Attractive pulls are included in Leigh Sliding Door sets — solid brass, polished and lacquered for a permanently bright finish. They're quickly installed with 2 brass screws. Face of pull is $1\frac{1}{8}$ " x 3". FLUSH PULLS can be purchased separately — packed 12 per box, including installation screws.

FACIA STRIP

Adds the finishing touch — dresses up door, conceals track and hanger. Better-looking and faster to install than wooden facia. Made of Double-Protected Steel — a tight zinc coating plus bonding — ready for painting to match woodwork. Slotted holes align doors of any thickness. Available as an extra in any standard length, packed in heavy shipping tube.

DOOR STOP

Limits sliding action so that fingers can't get pinched — provides a quiet, slam-proof installation. Heavy, zinc-coated steel with sturdy rubber bumper. Furnished as an extra — packed 12 per carton.

Packed 12 per carton. Shipping wt. — $1\frac{1}{2}$ lbs. per carton.

No. 701 — Door Stops

Packed 12 per carton. Shipping wt. — 2 lbs. per carton.

More living space is the new concept in today's modern homes — and Pocket Doors contribute additional space by eliminating the area needed for old-style swinging doors. Leigh Pocket Door Hardware offers you the magic of disappearing pocket doors at a surprising low cost. One complete package that ends installation problems.

LEIGH POCKET DOOR HARDWARE

**FASTER
INSTALLATION**

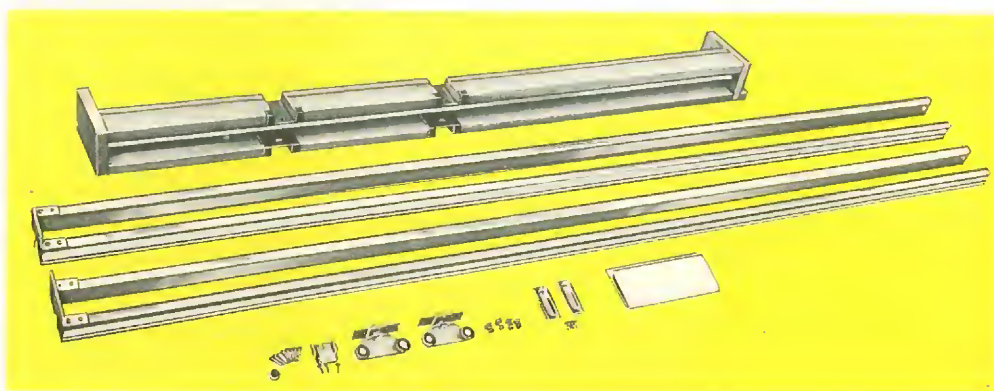

Leigh hardware saves you money on every disappearing door installation. They're installed in an absolute minimum of time that cuts labor costs — frame can be installed in rough opening in less than 15 minutes. Doors hook on track after hangers are installed, eliminates old time-consuming method, where hangers are first slid on track and door is then fastened to the hanger. The prefabricated steel jambs prevent warped walls that result in jamming doors and costly call-backs. Heavy-gauge track and sturdy, double-wheel hangers allow smooth, effortless operation of the heaviest door. A pocket door installed with Leigh hardware is your assurance of lasting satisfaction.

EVERYTHING FOR ONE INSTALLATION IN ONE PACKAGE

Simplifies stocking problems and assures complete on-the-job protection — no time wasted going back to the dealer for missing parts.

EACH KIT CONTAINS

- 1 Wood header with track
- 2 Pair Metal Split Jamb Assemblies
- 2 Hangers
- 1 Door Guide
- 1 Rubber Door Stop
- 2 Door Pulls
- All necessary screws
- Complete installation instructions.

Wooden header is completely assembled and has track installed — each header is sized to fit the door used and requires no cutting or fitting to install. Steel inserts are used to attach split jambs.

Rubber stop quietly stops door — at just the right position.

Steel split jambs have adjustment slots at top, makes it easy to plumb header and track on uneven floors. Metal jambs prevent warping, have wood inserts for nailing on wall material.

Base brackets on bottom of split jambs assure correct spacing of the jambs at floor level, holes are provided for nailing brackets to sub-floor.

Leigh Pocket Doors roll on 4 Sturdico Wheels, the finest wheel money can buy. Hangers with wheels are installed on door before it is hung. This easy method of hanging doors is made possible by the Leigh Lok-Tab Screw — once it is set, it prevents doors from ever jumping off the track. A lock nut arrangement at bottom of the hanger aligns door with the opening.

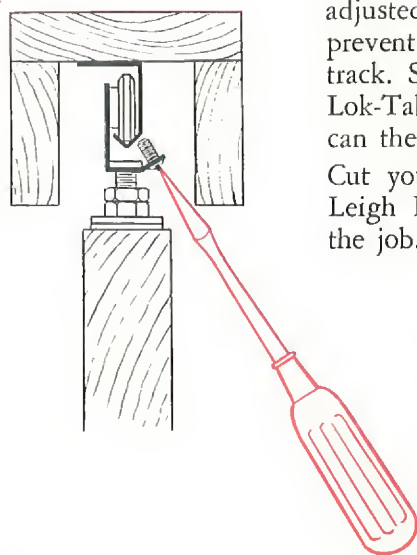

Polished brass door pulls are furnished for each side of door.

Polished aluminum door guide insures a smooth opening and closing door.

LEIGH LOK-TAB*

One of the outstanding features that cut down Pocket Door installation time is the Leigh Lok-Tab. This feature permits hangers to be installed on the door out in the open. After hangers are installed, door is hooked on the track, screws on Lok-Tab are then adjusted with a screw driver. These screws prevent the wheels from jumping off the track. Should it be necessary to remove door, Lok-Tab screws can be backed off, and door can then be unhooked from track.

Cut your installation costs and time with Leigh Pocket Door Sets, one man can do the job.

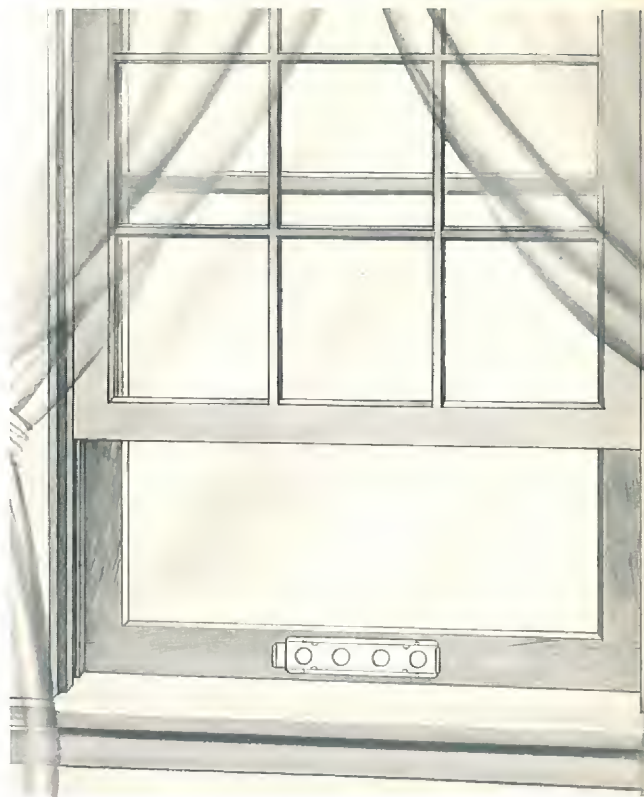

No. 702 End Pull — For use where side pulls cannot be reached because the door edge is flush with jambs when door is in the pocket. Installs on the front edge of door. Spring-loaded knob is easy to grasp, snaps back in place. Size—3" x 1 1/8". Solid brass. Available as an extra. Packed 12 per carton, Shipping wt. — 1 lb. 7 oz. per carton.

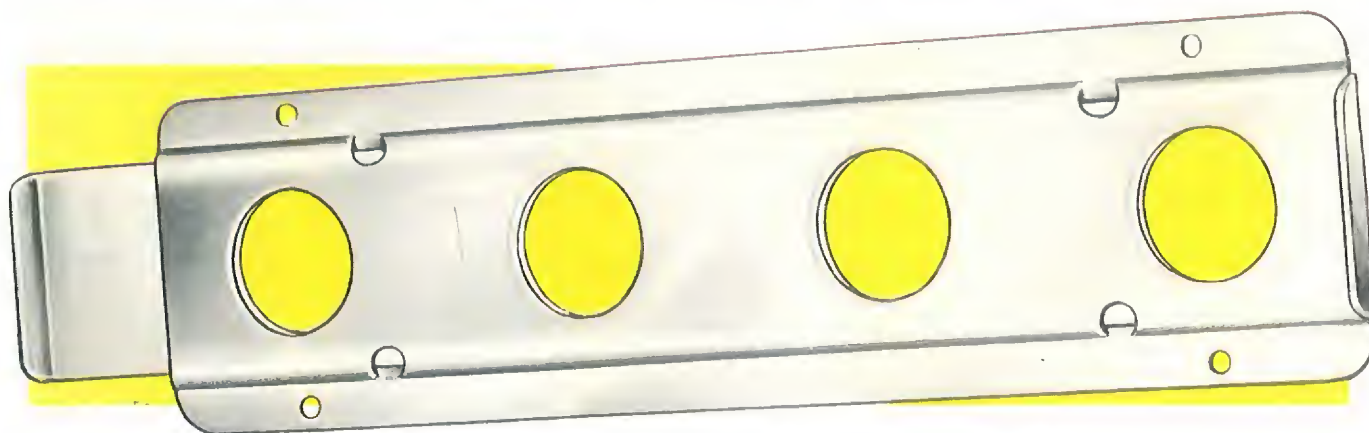

| SET NO. | DOOR SIZE | ROUGH OPENING | SHIPPING WEIGHT |
|---------|-------------|---------------|-----------------|
| 1020 | 2'0" x 6'8" | 4'1" x 7'4" | 45 lbs. |
| 1024 | 2'4" x 6'8" | 4'9" x 7'4" | 46 lbs. |
| 1026 | 2'6" x 6'8" | 5'1" x 7'4" | 47 lbs. |
| 1028 | 2'8" x 6'8" | 5'5" x 7'4" | 47 lbs. |
| 1030 | 3'0" x 6'8" | 6'1" x 7'4" | 49 lbs. |

PATENT PENDING*

Here's a solution to proper storm window ventilation. A flick of the finger provides controlled room ventilation — thanks to these handy little storm window ventilators. End "steamed up" windows and stuffy rooms forever. Easy to install — the handyman who claims a drill and a screwdriver can have them on every window in one rainy afternoon. It's the low cost, efficient way to provide winter ventilation.

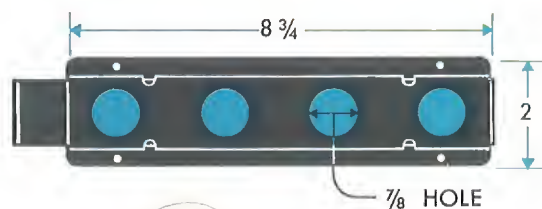

LEIGH STORM WINDOW VENTILATORS

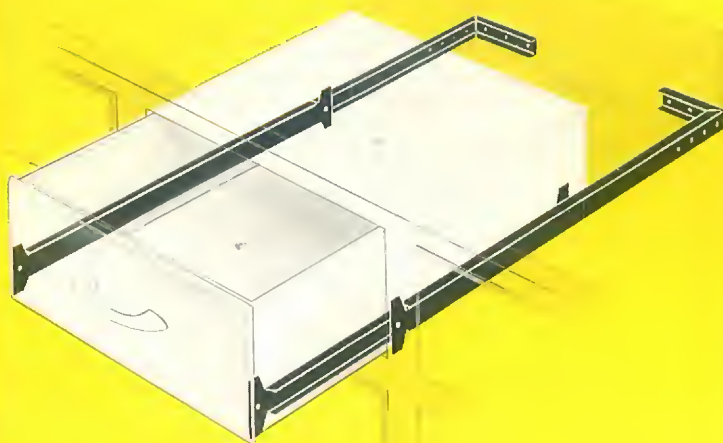

Built of heavy gauge rust-proof aluminum.

So easy to install — with ventilator as a guide, mark hole location on sash, drill four $\frac{7}{8}$ " holes and screw ventilator to sash. Ideal for old or new installations. The narrow width fits all wooden sashes, and can be installed on metal types as well. No experience or special tools required. Each ventilator is fastened to an attractive card, screws are attached. Overall size: $8\frac{3}{4}$ " x 2" — has four $\frac{7}{8}$ " holes. Packed 72 carded ventilators per shipping container, including attractive display carton. Shipping wt. — $8\frac{1}{2}$ lbs. Ideal for over the counter sales.

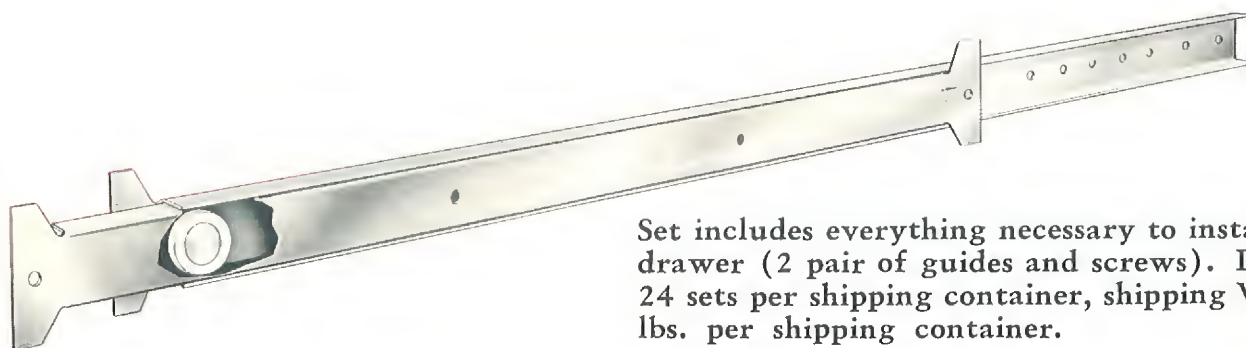

Attractive counter display carton holds 24 Ventilators, with each carton of 72 Ventilators.

Even the most unhandy man can install cupboard drawers that work like a charm by using Leigh Roller Drawer Guides. A roller bearing on each slide moves the heaviest load without effort, and the low cost per drawer is down-right astonishing.

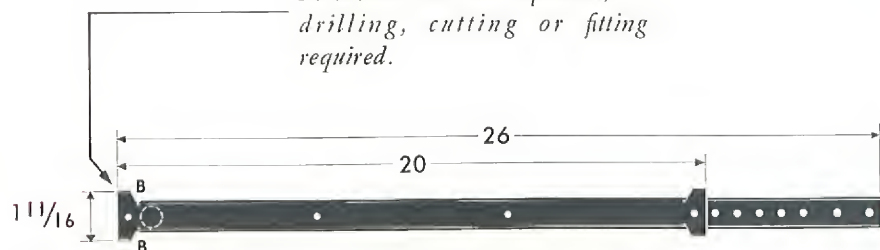

LEIGH ROLLER DRAWER GUIDES

Leigh Drawer Guides are built of heavy gauge Double-Protected Steel. Precision die formed to give exact fit. Will not warp or swell. Ends the sticking drawer problem forever. Heavy-duty roller wheels carry the load as the drawer is moved in or out. Location tabs on each end correctly position the slide on the drawer and in the cabinet. Anyone can install them in a matter of minutes.

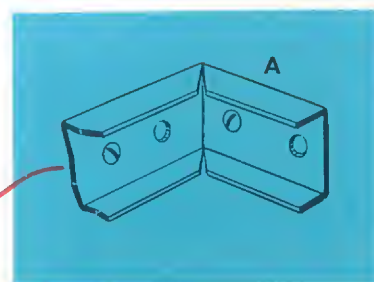

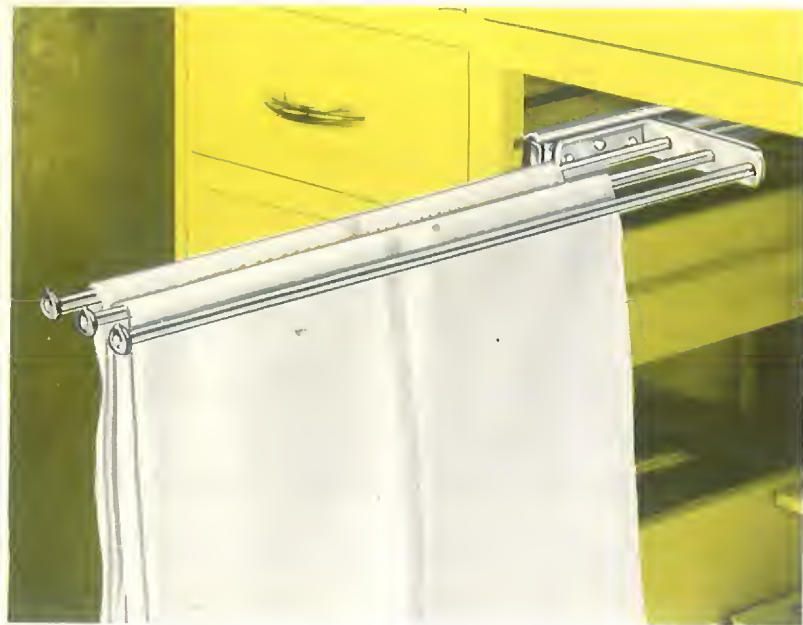

Set includes everything necessary to install one drawer (2 pair of guides and screws). Packed 24 sets per shipping container, shipping Wt. 40 lbs. per shipping container.

Tab (B) locate guides correctly on drawer and on cupboard, no drilling, cutting or fitting required.

Extra length is provided on back of slide to fit varying depth cupboards. To size, snip flanges and bend. Screw "A" to back of cupboard for additional strength.

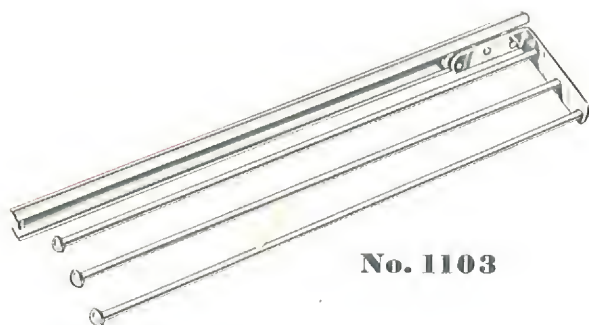

Loads of towels at your fingertips with the Leigh Sliding Towel Rack. Slides into the cabinet, under the sink, or washstand, out of sight. Sparkling, Chrome-plated bars hold towels apart so they are always dry and fresh — an inexpensive convenience that thrills every housewife.

LEIGH SLIDING TOWEL RACKS

Available in two models, for top or side mounting. Track is formed from heavy-gauge steel, will not spring apart or loosen under constant usage. Towel rods glide in and out on 3 ball-bearing wheels. Rubber bumpers on each end give quiet in-and-out operation. Heavy rods don't bend or come loose. Chrome-plated finish. Units are built for long life, yet are priced exceptionally low.

No. 1103

Side Installed Model

Designed for side installation. Heavy-gauge construction. Three sturdy bars to hang towels on. Beautiful Chrome-plated finish prevents rusting. One each in an attractive display carton, screws included. Packed 12 in shipping box, shipping wt. 36 lbs. per container.

No. 1104

Top Installed Model

Designed for top mounting. Heavy-gauge construction. Bars for extra capacity. Sparkling Chrome-plated finish prevents rusting. One each in an attractive display carton, screws included. Packed 12 in shipping box, shipping wt. 46 lbs. per container.

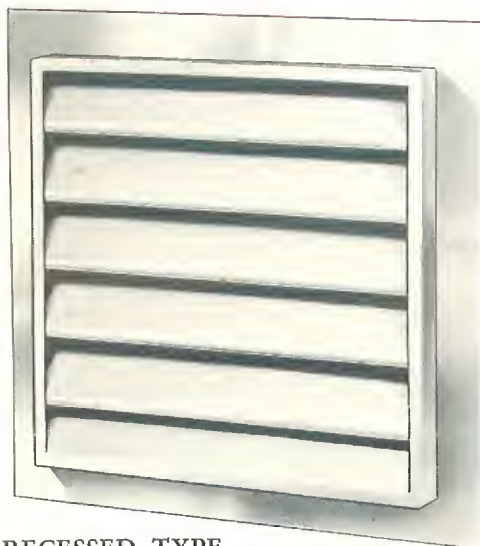

STYLED FOR THE MODERN HOME

FLUSH TYPE
No. 400, No. 500

Leigh Attic Ventilators are a necessity in all insulated homes. They keep attics free of moisture that condenses in the cold winter months and provide a means of escape for excessive summer heat. The massive, full-depth louvers add a smart modern touch to any home. Minimum cost and high quality have made these ventilators the most popular in the industry.

LEIGH ATTIC VENTILATORS

RECESSED TYPE
No. 401, No. 501

Leigh Ventilators have heavy louvers with a rolled front edge that gives a massive appearance — back edge is turned up to deflect rain or snow. Full 2" depth and 45° angle gives maximum free area (see chart below). Ventilators should be selected on the basis of free area — not size. Screened with 8-mesh screen (meets F.H.A. requirements) — increases effective area and will not clog with lint, etc. Channel on back can be used to insert glass or sheet metal if closing is required.

TWO TYPES **FLUSH TYPE** for old or new construction.

RECESSED TYPE for new construction. Recessed flange fastens to sheathing — brick or siding butts against frame.

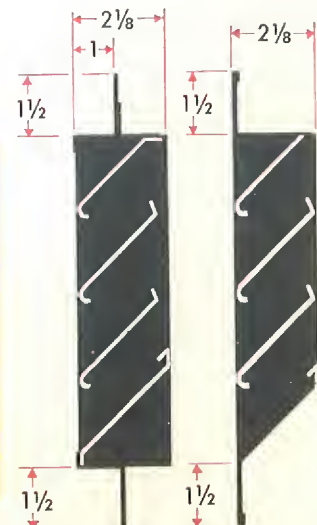

Two Series: No. 400 SERIES, built of rust proof aluminum.

No. 500 SERIES, built of Double-Protected Steel (steel with a zinc coating plus bonderizing — a double rust protection and an excellent paint base.)

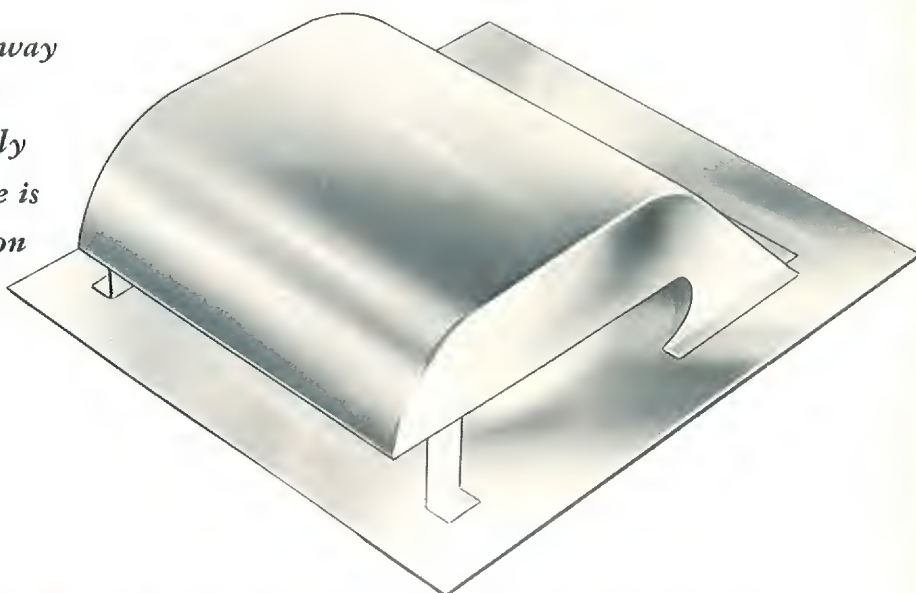

Sizes and Areas — Nos. 400, 401, 500 and 501 Ventilators

| Opening Size (Width x Height) | Overall Size | Free Area No. 400 or 500 | Shipping Weight (Per Shipping Carton) | | Free Area No. 401 or 501 | Shipping Weight (Per Shipping Carton) | |

Packed 10 per carton. Other sizes available. Refer to factory.
24 x 30 Packed 2 per carton. *Made in No. 400 or No. 500 only.

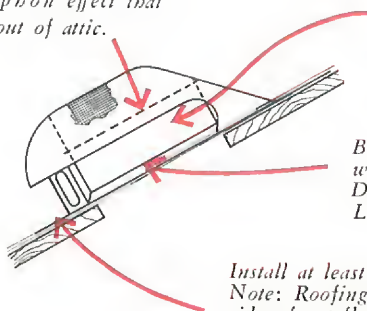

The finest ventilator for use on 4-way roofs is the Leigh Roof Ventilator. The low silhouette blends smoothly into any roof line and performance is tops. You get double the ventilation at half the cost of any other make when you install Leigh Roof Ventilators.

LEIGH ROOF VENTILATORS *

The most efficient roof ventilator ever built. This patented design — exclusive with Leigh Ventilators — gives greater ventilating area with a lower, more compact unit. Special venturi opening aids in moving attic air. 8-mesh screen meets F.H.A. requirements. Built of Aluminum or Heavy Galvanized Steel. Ideal for use with Leigh Under-the-Eaves Ventilators. (Page 37) Gives an air movement through the eaves and out roof ventilators at the roof peak.

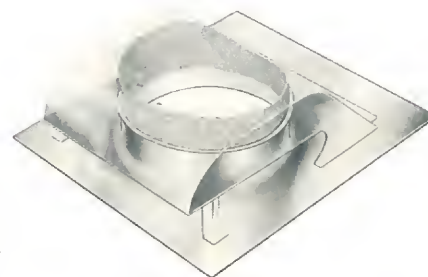

Round venturi opening creates siphon effect that pulls air out of attic.

Ventilator is open on three sides to insure much greater free area than ordinary ventilators that have only a small front opening.

Bottom section is stamped from one piece, no welds or joints to leak water into the attic. Driving rains and snows don't bother your Leigh Roof Ventilator installation.

Install at least one ventilator on each section of roof. Note: Roofing is laid over wide flange at back and sides, front flange of ventilator lays over roofing, this installation assures you a water-tight, leak-proof installation.

PHANTOM VIEW

Shows how patented design provides an exceptionally large ventilating area in a low, compact unit.

LEIGH MINIATURE VENTILATORS

2 1/2" SIZE — The perfect size for Insulators, Roofers, etc. — the size of a 2 1/2" hole saw. Screened.

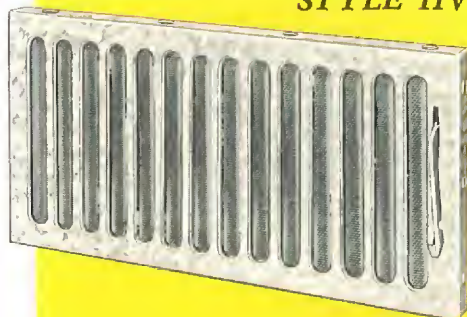

1" Size — Ideal wall ventilator size for those paint peeling problems.

Eliminate moisture condensation with Leigh Miniature Ventilators. These all aluminum rust-proof ventilators keep out rain or snow yet provide desired ventilation. Prevents the principal cause of paint peeling and blistering. Keeps insulation dry and efficient. Hundreds of applications.

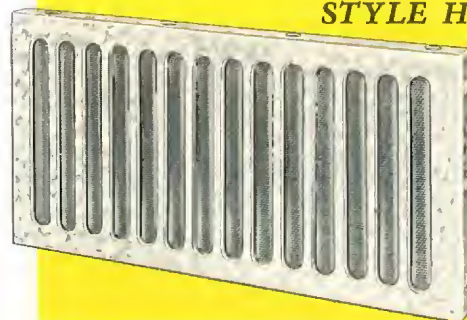

Recessed louvered face makes installation very easy. After drilling the holes, simply tap in place with block of wood — prongs on back hold ventilators in place. Louvered design will not clog with paint, yet conceals the opening. Built for two hole sizes. 2 1/2" Size — packed 36 per shipping container, shipping wt. 2 lbs., 3 ozs. per container. 1" Size — packed 12 per display carton, 12 cartons per shipping container. Shipping wt. — 2 lbs. per shipping container.

LEIGH HEAVY DUTY FOUNDATION VENTILATORS

STYLE HV

STYLE H

Leigh Heavy Duty Ventilators are built of extra-heavy, (14 gauge) metal. After fabrication, ventilators are hot dipped galvanized for years of rust-proof protection. Vertical bar design makes the unit rigid and strong — eliminates the need of lintel when ventilator is mortared in with the block. Projection margins have special holes that provide a positive mortar lock. 8-Mesh Screen on back meets F. H. A. specifications.

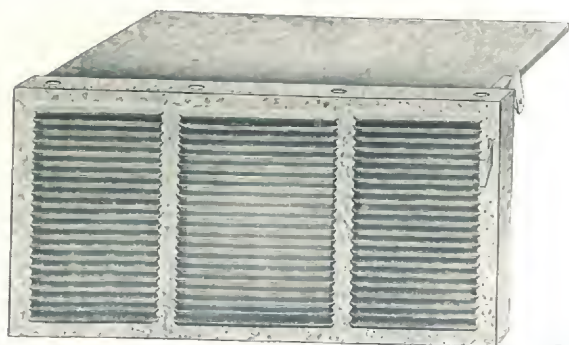

Overall size of ventilator is 15 5/8" x 7 5/8".

Available in two styles.

STYLE HV — complete with shut-off damper.

STYLE H — without damper.

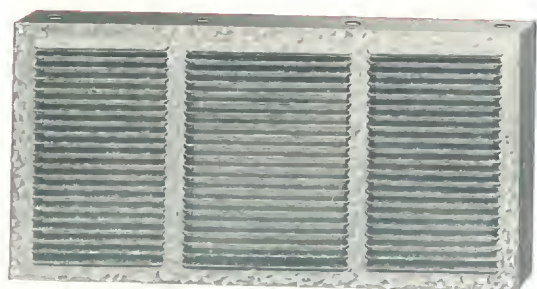

Each unit has actual free area of 52 square inches. Packed 10 per carton. Shipping wt. per container, HV — 39 lbs., H — 28 lbs.

The perfect low cost answer to foundation ventilation. Large ventilating area, sturdy construction, with or without damper. Meets F.H.A. requirements for unexcavated basements, crawl spaces, fruit cellars, farm buildings, etc.

STYLE MV

LEIGH FOUNDATION VENTILATORS

STYLE M

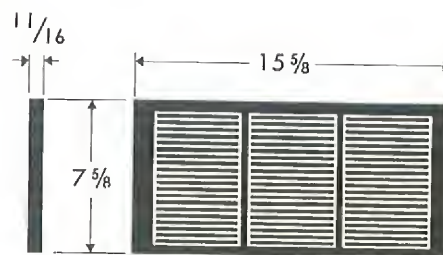

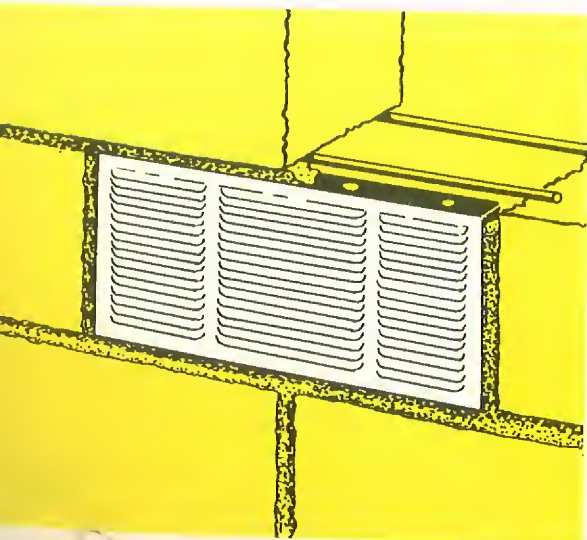

Both MV and M Style Foundation Ventilators are easily installed in any concrete or masonry wall. Fits 16" x 8" opening.

STYLE MV . . . With Damper

Finned louvers deflect rain and snow, screened on back to keep out rodents. Install in block walls when blocks are laid — same size as block (16" x 8"). Has projecting margins with holes for mortar lock. Built of Galvanized Steel with 8 Mesh Screen, meets F.H.A. requirements. Free area 86 sq. inches. Packed 10 per carton. Wt. — 22 lbs.

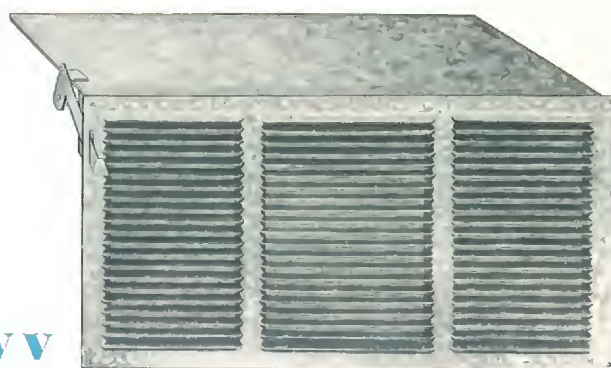

STYLE M . . . Without Damper

Same construction as Style MV, without damper. This low cost ventilator with 8 Mesh Screen meets F.H.A. requirements. Fits 16" x 8" opening. Free area, 89 sq. inches. Packed 10 per carton. Wt. — 13 lbs.

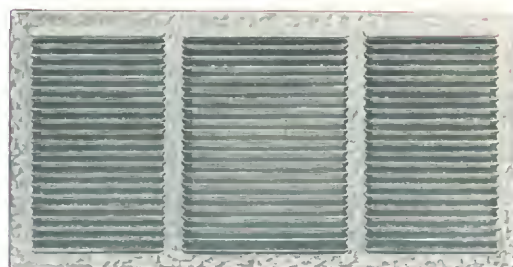

These Leigh Ventilators are the perfect answer for under-eaves attic ventilation. Also suitable for foundation ventilation on all types of houses. The ideal low-cost answer to hundreds of ventilating problems in farm buildings, unexcavated basements, crawl spaces, attics, etc.

STYLE WV

LEIGH UNDER-EAVES VENTILATORS

STYLE W

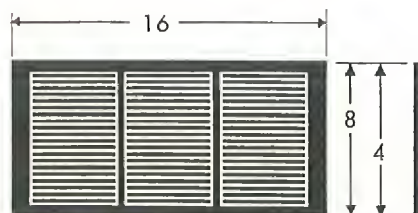

STYLE WV (with damper)

Installed in walls above foundation or on the under side of overhanging eaves. Finned louvers deflect water and snow, 8 mesh screen meets F.H.A. requirements. Built of galvanized steel. 16" x 8" (86 sq. in. free area). Packed 10 per carton, shipping wt. — 22 lbs.

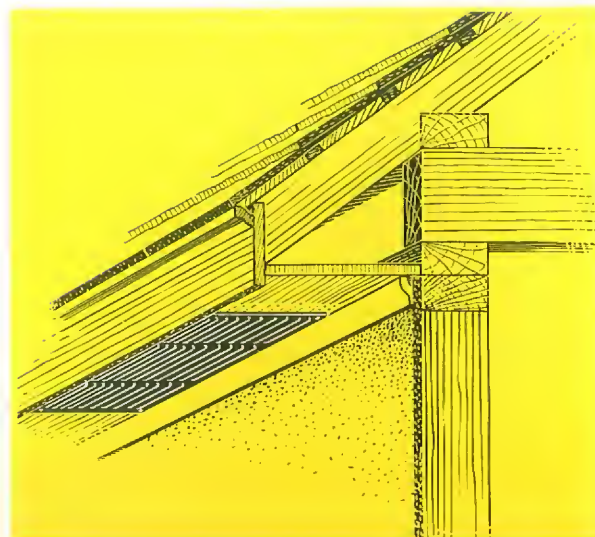

STYLE W (without damper)

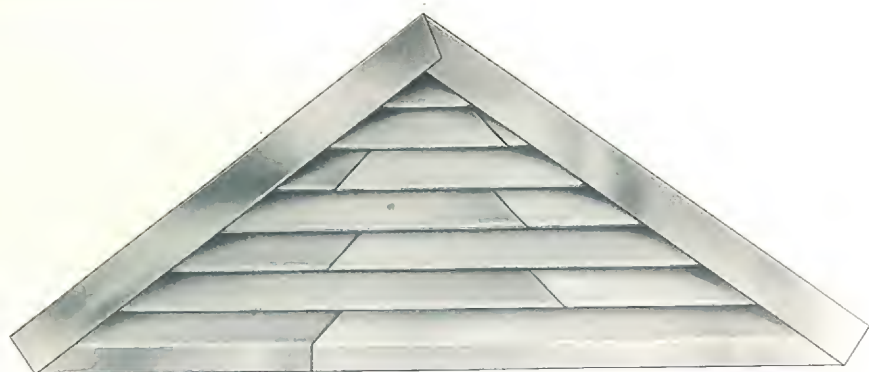

Same construction as Style WV, except without damper. Two sizes — 16" x 8" overall (89 sq. in. free area), and 16" x 4" (29 sq. in. free area). Packed 10 per carton, shipping wts. 13 lbs. — 16" x 8" — 6½ lbs. — 16" x 4". Specify size.

Ideal for foundation ventilation too. Installed in walls immediately above the foundation, covers opening between floor joists.

Install on underside of overhanging eaves for attic ventilation. Ideal for low pitched roofs. Excellent results are obtained when used with Leigh Attic or Roof Ventilators.

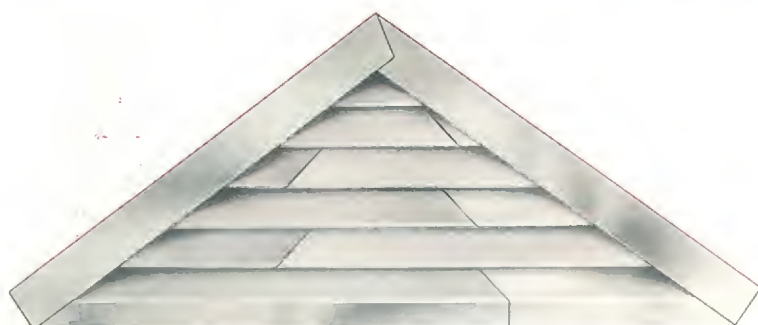

No. 417 Aluminum

No. 517 Double Protected Steel

Leigh Adjustable Triangle Ventilators are accepted by builders everywhere as the peak type ventilator to use on gable installations — because they fit practically all roof pitches, and they are built to last the life of the house.

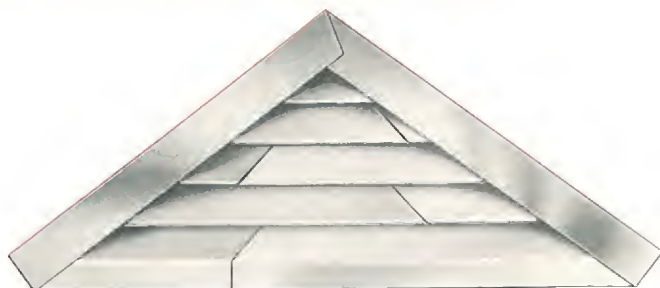

LEIGH ADJUSTABLE TRIANGLE VENTILATORS

No. 416 Aluminum

No. 516 Double Protected Steel

Leigh Adjustable Triangle Ventilators are easily installed in the peak of any wall. Sliding louvers permit adjustment to fit a variety of roof pitches. Louvers are fastened into side margins in such a way that they become an integral part of the frame. They cannot come loose and fall out. Front edge of louver is rolled for greater strength and a better appearance. Back edge of louver has a special rain and snow deflecting flange. 8-Mesh Screen is furnished for use in back of ventilator. Extra wide flanges make it easy to install and aids in making the installation weather-tight.

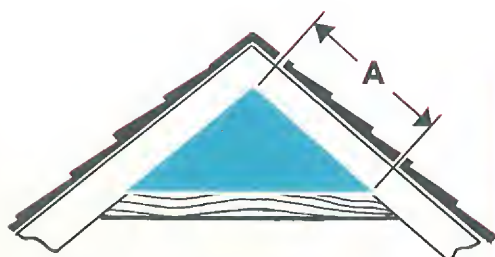

No. 415 Aluminum

No. 515 Double Protected Steel

Ventilators are furnished in three different sizes and are available in Aluminum or Double-Protected Steel.

*Packed — Nos. 417, 416 & 415 — 2 per carton, 6 cartons per case.
Nos. 517, 516 & 515 — 2 per carton, 3 cartons per case.*

LEIGH Giant TRIANGLE VENTILATORS

For LOW PITCH ROOFS (5-12 Pitch)

344 SQ. IN. FREE AREA. (5-12 Pitch)
No. 428 Aluminum — No. 528 Double-Protected Steel.

187 SQ. IN. FREE AREA. (5-12 Pitch)
No. 426 Aluminum — No. 526 Double-Protected Steel.

84 SQ. IN. FREE AREA. (5-12 Pitch)
No. 424 Aluminum — No. 524 Double-Protected Steel.

You'll find the Leigh Giant Triangle Ventilators ideal for those installations requiring large ventilating areas. They are completely assembled and ready to install.

Louvers have a special strengthening form and are locked into side margin with tabs, they won't come loose or fall out. Front edge of louver is rolled for massive appearance and the back edge has a special flange to keep out driving rains. A 1 1/2" margin provides ample coverage around opening, all edges are hemmed for additional strength. Ventilators have 8-mesh screen in back. (Meets F.H.A. requirements.)

No. 428 and No. 426 Series are made in two parts for easier handling and damage-free shipping. The two halves are easily snapped together, no tools required. No. 424 Series are made in one piece.

All Giant Triangle Ventilators are packed 2 per carton.

Shipping wts. per carton:

428 (Aluminum) 18 1/2 lbs.
528 (Steel) 34 lbs.
426 (Aluminum) 12 1/2 lbs.
526 (Steel) 23 lbs.
424 (Aluminum) 7 1/2 lbs.
524 (Steel) 13 lbs.

LEIGH Stationary TRIANGLE VENTILATORS

No. 403 (Aluminum) — No. 503 (Double-Protected Steel)

These low priced peak type ventilators give weatherproof attic ventilation at a real saving in cost. Built with rigid full-depth water-deflecting louvers, complete with attached screen.

Built in Two Sizes

9-12 pitch (free area 84 1/2 sq. in.) has ample margins to fit 8-12, 9-12 or 10-12 roof pitches.

6-12 pitch (free area 84 1/2 sq. in.) has ample margins to fit 5-12, 6-12 or 7-12 roof pitches.

All Stationary Triangle Ventilators are packed 10 per carton.

Shipping wts. per carton:

9-12 Pitch (Aluminum) 18 lbs. — (Steel) 39 lbs.
6-12 Pitch (Aluminum) 20 lbs. — (Steel) 47 lbs.

9-12 Pitch (Fits opening 11" high x 29" wide)

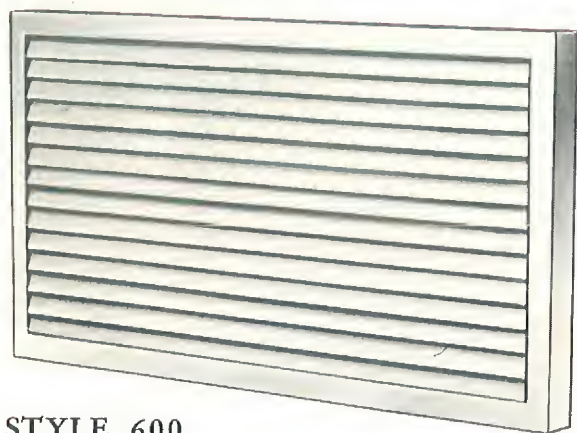

6-12 Pitch (Fits opening 9" high x 36 1/4" wide)

STYLE 600F
frame attached

LEIGH VISION-PROOF GRILLES

STYLE 600
without frame

STYLE 600F—This model has a $1\frac{7}{8}$ " frame on one side with screw holes for mounting. Grille is only $\frac{3}{4}$ " thick, making it especially adaptable for use with new modern interior doors. Inverted V-shaped grilles allow ample ventilation, yet cannot be seen through from any angle.

STYLE 600—This model is identical to style 600F, except it comes without frame. When installing, quarter round trim is used in opening.

SEPARATE FRAMES are also available. Suitable for use with either Style 600F (where frame is required on other side of grille) or Style 600.

For all ventilating and heating returns you'll find no better unit than the Leigh Vision-Proof Grilles. They are sight-proof and practically light-proof, insuring privacy wherever they are installed. Unique V-shaped louvers baffle sound and reduce noise transmission

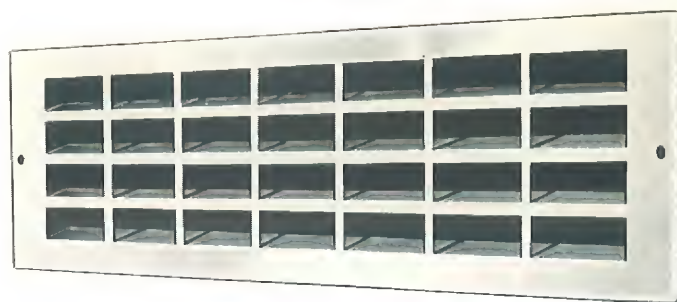

LEIGH Vision-Proof Grilles are available with or without frames. Frames may be purchased as separate unit.

LEIGH NO. 330 Adjustable CEILING VENTILATORS

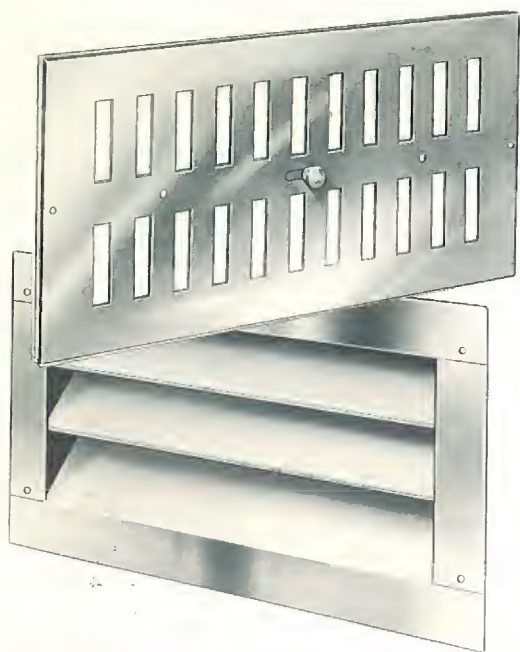

You will be pleased with this smart-looking ventilator that is designed especially for distributing heat to second-floor rooms.

This unit is built to circulate warm air to upper rooms when heat is provided by pipeless furnaces, stoves, space heaters, etc. May also be installed in walls to let heat into the adjoining room. Anyone can install it in a few minutes time.

Unit consists of a black register with shut-off damper, white face and connecting telescoping box. Can be installed in a few minutes.

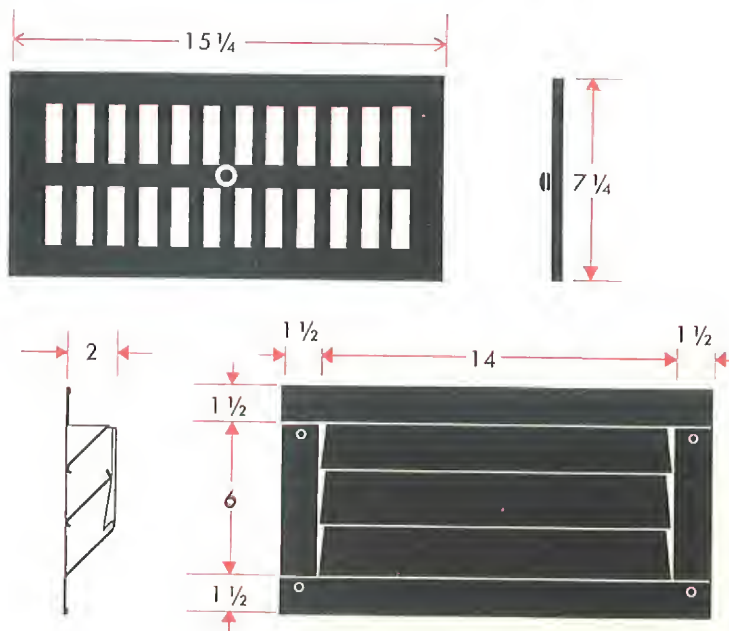

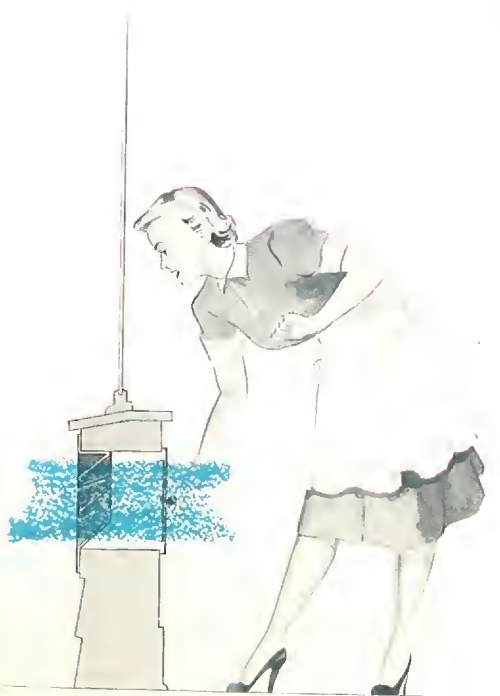

| No. 330 Packed one unit per carton | SIZE (Opening) |
|---------------------------------------|-------------------|
| UNIT INCLUDES: | 8 x 10 |
| REGISTER, GRILLE, | 9 x 12 |
| TELESCOPING METAL | 10 x 12 |
| BOX AND SPRINGS | 12 x 14 |

Picture windows are beautiful, but in many installations there is no way to ventilate the room on hot summer days. Leigh Thru-The-Wall Ventilators are your answer to this problem — installed under the picture window they allow air to circulate throughout the room. Best of all, they blend with the house style inside and outside.

LEIGH THRU-THE-WALL VENTILATOR

Complete unit consists of 2 parts — outside ventilator and inside closable register. Outside Ventilator has weatherproof louvers, 2" deep, set at a sharp angle to keep out rain and snow. Insect screen on back keeps out insects. Inside closable register has sliding damper that closes airtight when desired — 14" x 6" opening provides ample free area. The ideal unit for the many applications requiring a closable ventilator. Both units built of heavy gauge steel; Double Protected by a tight zinc coating and Bonderizing — provides many years of rust-resistant service. Register finished in Beige enamel, can be painted to match room interior. Complete unit, both parts, packaged in one carton. Shipping wt. — 4 lbs. Register and ventilator also available separately.

The perfect ventilator for cement block, masonry or brick buildings — with ample ventilating area for foundations, flat-roofed buildings, fruit cellars, farm buildings, etc.

LEIGH CEMENT BLOCK VENTILATORS

Ventilator is 16" x 8", the same size as a cement block, can be mortared in with blocks when wall is laid. Ventilator is built of heavy-gauge Galvanized Steel. Louvers have rolled front edge for massive appearance, back of louver has a water-deflecting flange to keep out wind-blown rain. Full 2" depth louvers are tabbed into side margins, won't rattle or fall out. Back is screened with 8 Mesh Screen. Meets F.H.A. requirements.

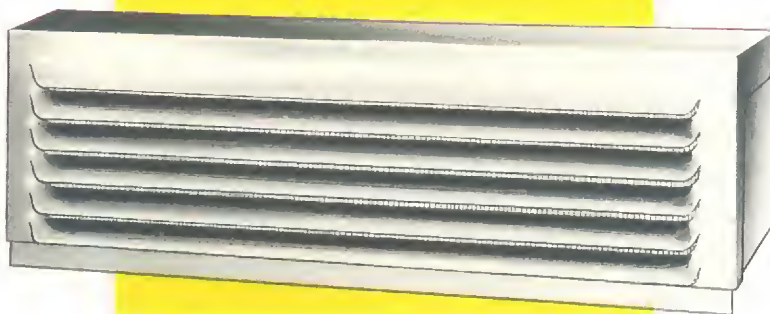

SIZE — 16" x 8". Same overall size as cement block.

FREE AREA — 77 sq. inches

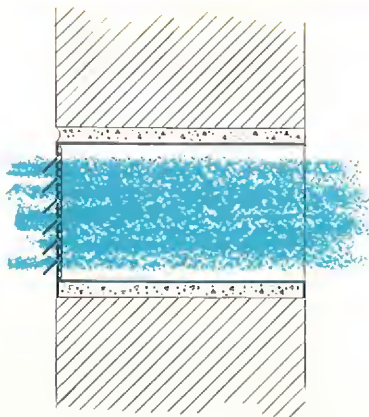

PACKED 10 VENTILATORS per shipping carton.

SHIPPING WEIGHT — 20 lbs.

LEIGH BRICK VENTILATORS

The ideal ventilator for use in brick walls. Mortars into same space as a brick, and is not noticeable when painted color of brick.

Louvered face deflects rain, conceals opening and provides a maximum of free area. A bottom flange, formed down on front edge, provides correct location when mortared in place. Full 4" depth and self-draining feature prevent leakage. Built of Galvanized Steel, with 8 Mesh Screen. (Meets F.H.A. requirements.)

SAME SIZE AS A BRICK, FREE AREA—13 sq. inches.

PACKED 10 per carton. SHIPPING WT. — 9 lbs.

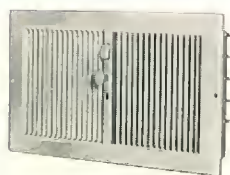

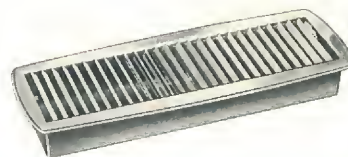

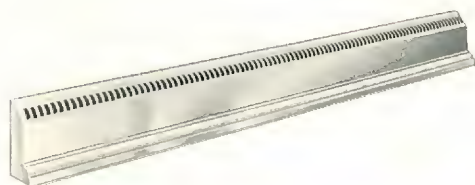

Air Control Products, Inc., is one of the largest manufacturers of Registers, Grilles and Diffusers for residential Heating and Cooling.

Creative engineering and an intensive research program have made Air Control the accepted leader in the heating and ventilating field. This outstanding line of registers and diffusers assures you of efficient, draftless air distribution on every type of residential heating and cooling system. Styled by top-notch designers, each unit harmonizes with any interior and assures home-owner acceptance. They're mass-produced in a modern plant, using the latest production methods — your guarantee of a quality product at the lowest possible cost.

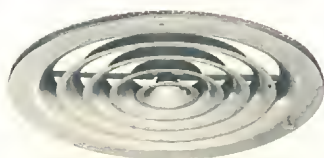

For the very finest on your heating and cooling installations, always use Air Control Registers, Grilles and Diffusers — the complete line that meets your every requirement. Write for our beautiful 4-color catalog, 54-AC, complete with installation and engineering data.
